

Requirements for Team Crunchy

Sept 25, 2025

Website with a light blue background, (html,css,js, or react ok)

Responsive for both desktop and mobile

- Home page on What the website is about
- Has many recipes (at least 5 end of sprint)
- If user click on recipe goes to recipe itself
- Login/login page
 - Some input for email/password
 - Doesn't need to work rn just show
- 3 main tabs, recipe search, community, profile
 - Recipe search
 - This is priority
 - Search is for title
 - But search can also filter based with filters on cuisines, diet, sugar free, meal type, allergies,
 - Community
 - A future feature
 - Profile
 - Your profile, a future feature

OPTIONAL - Drop-down (FAQ-like) just for recipe page (IN SPECIFIC RECIPE PAGE)

- Try to keep minimalistic and not overwhelming

Can use tailwind

Relational database (prolly)

We need a way to store photos as well

Can use local db postgres imo

Maybe django backend (built in database(postgresql) + authentication system + admin portal)

User Object-

```
Const recipes: []Recipe = {  
  {}  
}
```

Recipe Object-
